ADORA

Best of the Maldives with Hanifaru Bay

Male to Male | North Male, Baa, North Ari and South Male

Dive into the heart of the Indian Ocean on a route that spans the central atolls and the renowned Baa Atoll.

You will encounter dazzling reef fish, majestic manta rays at their cleaning stations and whale sharks cruising over coral-draped pinnacles.

Each dive unveils something extraordinary: dramatic topography, high-adrenaline channels or tranquil drifts across vibrant coral gardens.

The adventure peaks in Baa Atoll, a UNESCO Biosphere Reserve, timed with the southwest monsoon, typically in August or September.

As nutrient-rich waters surge in with the full moon tides, they spark a dense plankton bloom in Hanifaru Bay.

It draws dozens of reef manta rays, and occasionally whale sharks, into a breathtaking cyclone-feeding spectacle.

WORTH KNOWING

Key notes

Insurance

Dive insurance is mandatory, and travel insurance is recommended

Good to know

The route can change to suit the weather and sea conditions

Good to know

Open Water divers are welcome, but some sites are deeper than their limit, so they need a private dive guide or the Advanced Open Water course on board

Good to know

Nitrox certification is available on board

Good to know

Hanifaru Bay mantas and whale sharks depend on the season and the full moon tides, and sightings cannot be promised
