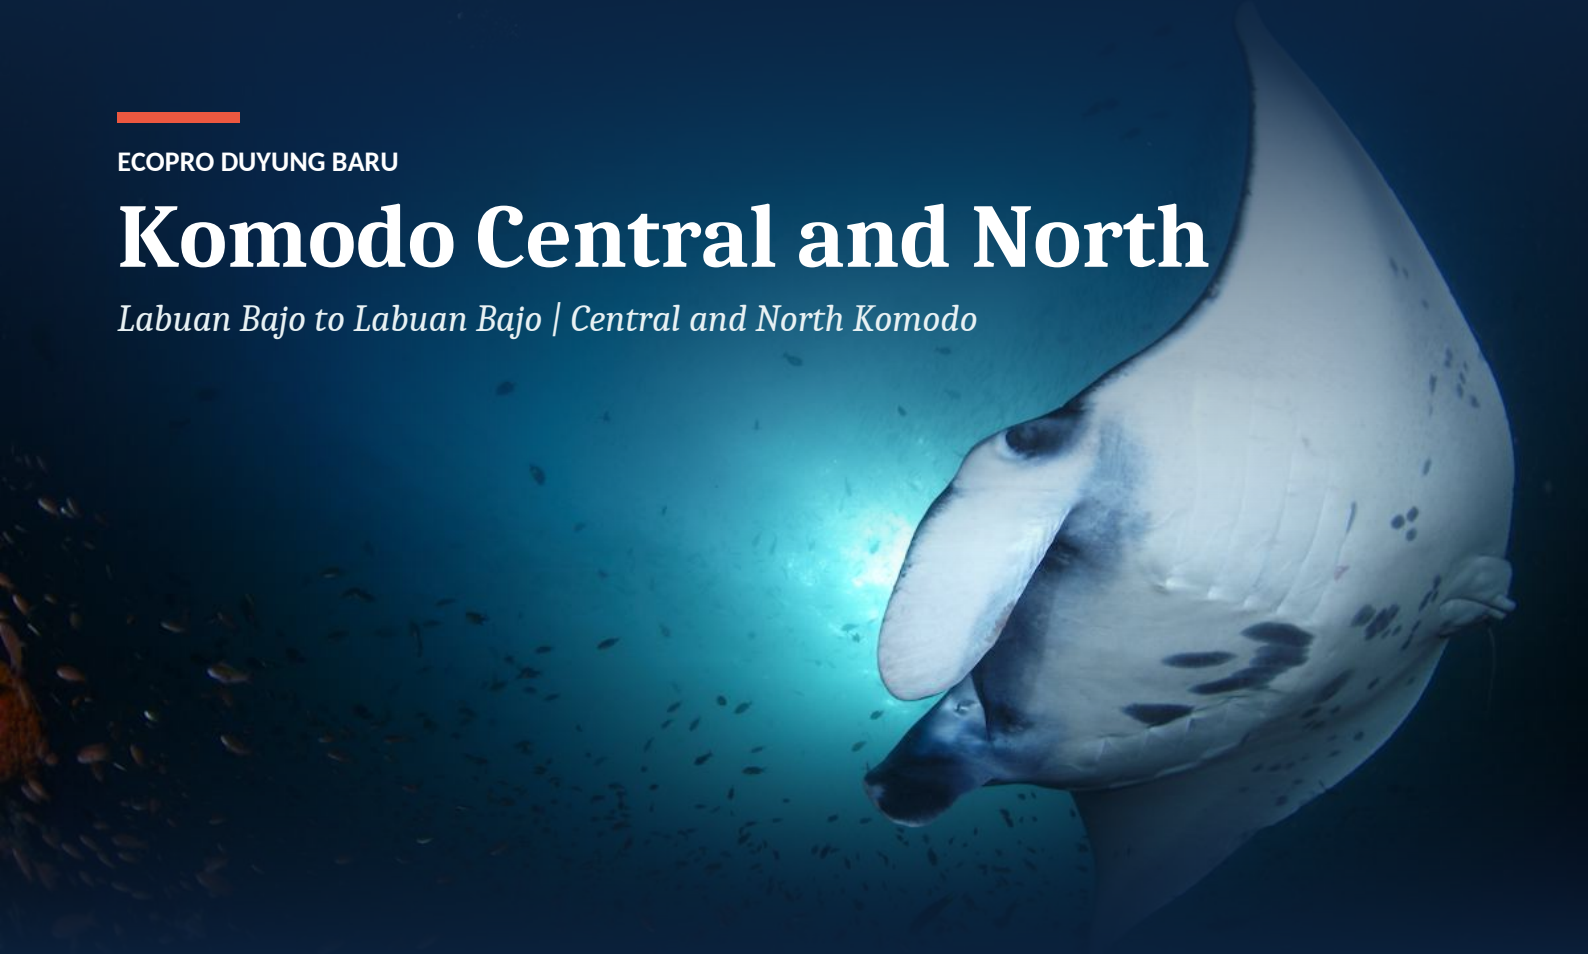
# Komodo Central and North

*Labuan Bajo to Labuan Bajo | Central and North Komodo*



This seasonal itinerary covers the best of Central and Northern Komodo, when dry season conditions bring clear skies, calm seas and excellent visibility.

Expect vibrant reefs, thrilling drift dives and a high chance of seeing manta rays, reef sharks and schooling pelagics.

North Komodo is known for rich coral gardens and action-packed dive sites that are ideal during the mid-year months.

Iconic pinnacles with strong currents hold sharks and jacks, and a fast-paced drift through a narrow channel is often joined by mantas.

A coral-covered seamount ranks among the best in Indonesia, and colourful reef walls sit beside rich coral gardens full of turtles and macro life.

A Komodo dragon walk on Rinca or Komodo Island and sunsets on deck complete it.

GOOD TO KNOW

# On land and on the way

### For snorkellers

This is a top-choice route for snorkellers. The northern and central reefs are shallow, colourful and full of life, mantas, turtles and reef sharks are often spotted from the surface, and many sites are protected and calm.

### Beyond diving

A Komodo dragon walk on Rinca or Komodo Island, visits to white sand beaches and snorkel stops at untouched coral gardens, and dramatic island landscapes and unforgettable sunsets on deck.

### When and for whom

Best time to travel: may to October. Recommended for: divers of all levels and snorkellers.
