ECOPRO DUYUNG BARU

Komodo Central and South

Labuan Bajo to Labuan Bajo | Central and South Komodo, Nusa Kode and Horseshoe Bay

This special itinerary explores both Central and Southern Komodo, a seasonal adventure into cooler, nutrient-rich waters teeming with life.

While Central Komodo delivers colourful reefs and mantas, the south, especially around Nusa Kode and Horseshoe Bay, reveals a wilder, more remote side of the national park.

Manta rays are the draw of the wet season, with the best sightings of the year, and Central Komodo adds colourful reefs.

Dramatic walls are covered in soft corals and critters, and one site is a macro paradise and among the most biodiverse in the park.

Nudibranchs, frogfish, pygmy seahorses and the occasional whale ray share the reefs, and a geothermal reef has bubbles rising through unusual life.

On land are the iconic Komodo dragons, remote beaches and lush volcanic backdrops.

GOOD TO KNOW

On land and on the way

For snorkellers

This itinerary suits confident snorkellers. Central Komodo has calm, shallow sites with mantas and turtles, while the southern spots may have cooler water and occasional swell, but also fantastic coral gardens and frequent manta sightings at the surface.

Beyond diving

A land visit to Rinca or Komodo Island to see the iconic Komodo dragons, peaceful anchorages, remote beaches and lush volcanic backdrops, with fewer boats and more wilderness.

When and for whom

Best time to travel: october to April. Recommended for: experienced divers and adventurous snorkellers.
