MALDIVES MASTER

Central Atolls and Baa

Male to Male | North Male, Baa, North Ari, Vaavu and South Male

Manta rays run through this route, from a North Male cleaning station where they can be seen throughout the year to Baa Atoll, best known for Hanifaru Bay, where mantas gather to feed at certain times of the year.

Snorkelling is allowed in the bay with an official guide, and the thilas around it are for the diving.

Grey and white-tip reef sharks gather in large numbers in the channels of Vaavu, and nurse sharks circle around you.

South Male ends with schools of eagle rays and overhangs covered in sea fans and soft corals.
