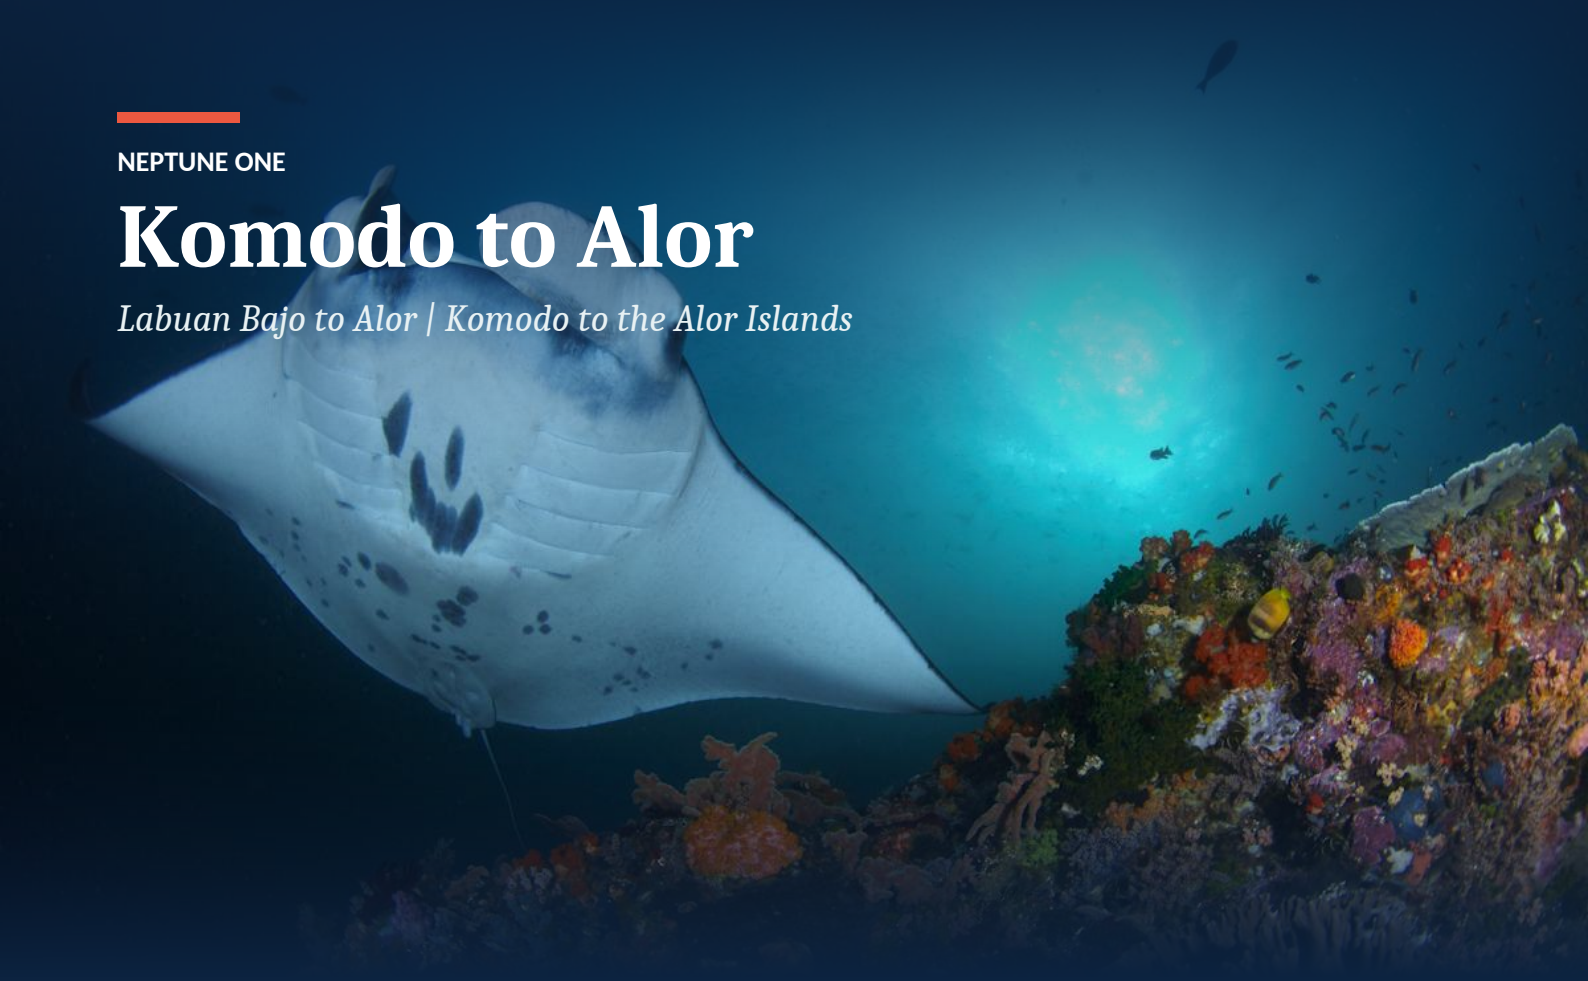
NEPTUNE ONE

Komodo to Alor

Labuan Bajo to Alor | Komodo to the Alor Islands



Few trips cover so much ground, from the strong currents of Komodo to the cold upwellings of Alor.

In Komodo you drift past rich coral gardens with reef mantas, turtles and large schools of reef fish, then take thrilling current dives with reef sharks, trevallies and swirling barracuda.

Further along, vibrant macro reefs hold frogfish, ghost pipefish and ribbon eels, among pristine soft coral formations.

Alor is the prize, where cold upwellings attract mola mola and dramatic walls hold sea snakes and large groupers.

Strong currents run over beautiful coral plateaus, with rhinopias and pygmy seahorses as the critter surprises.
