SAMAMBAIA

# Komodo National Park and around

*Labuan Bajo to Labuan Bajo | Komodo National Park*

Komodo National Park has coral reefs, seamounts and semi-enclosed bays, with over 1,000 fish species and 260 reef-building coral species.

Strong currents run through many sites, and sharks and other pelagics gather around the rocks and reefs where the water moves fastest.

In the south, plankton and upwelling in the dry season bring many invertebrates.

On land, giant lizards about 3 metres long live on Rinca, Nusa Kode and Komodo, in a volcanic landscape of savannah, blue lagoons and white, pink and red sand beaches.
