

RAJA AMPAT  
WAYAG  
Snorkelling Itinerary

9 DAYS / 8 NIGHTS CRUISE

Anne Bonny Liveaboard

# Introduction

The sample itinerary below highlights what you can expect on one of our adventure and leisure cruises to Raja Ampat.

Each cruise is unique; navigation and dive sites may vary slightly due to weather conditions and visibility.

The port of departure and arrival is Sorong harbour (West Papua, Indonesia).

We depart around noon time and arrive at the harbour on the late night of the day before last.

## Destination - Raja Ampat

Raja Ampat, or the Four Kings, is an archipelago located off the northwest tip of Bird's Head Peninsula on the island of New Guinea, in Indonesia's West Papua province. It comprises over 1,500 small islands, cays, and shoals surrounding the four main islands of Misool, Salawati, Batanta, and Waigeo, and the smaller island of Kofiau.

The Raja Ampat archipelago straddles the Equator and forms part of the Coral Triangle which contains the richest marine biodiversity on earth.

The rain forests that cover the islands are the natural habitat of many species of birds, mammals, reptiles and insects.

Raja Ampat is considered the global center of tropical marine biodiversity. The region contains more than 600 species of hard corals, equaling about 75 percent of known species globally, and more than 1,700 species of reef fish. A lot of it can be seen by snorkeling. Compared to similar-sized ecosystems elsewhere in the world, this makes Raja Ampat's biodiversity the richest in the world.
