Alor has its own microenvironment fed by currents from both the Indian and the Pacific oceans. Its waters are extremely rich, with a good variety of "big" and "small" life. The channels between its islands are established passages for cetaceous and blue and sperm whales are not uncommon sights. Below will be the draft itinerary when you are onboard of Damai:

Day 1: Arrive in Maumere

Guests will arrive in Maumere and have time to get comfortable on the boat. We will depart once we have settled on the boat, and head towards the island of Pomona for a checkup dive:

Sloping reefs, combination of sand and corals, chances to see pygmies in the numerous fans that we will find along these easy dives.

No. of Dives: 1

Day 2: Tanjung Bacatan & Komba

In the north of Kawula island, Tanjung Bacatan is a classic. Deep slope that gentle gives way a wall, passing Tunas, Wahoo and other pelagic are expected to be spotted. After two dives we sail towards the volcano if Komba, active until very recently and always a beautiful sight. We will look for whales on our way.

No. of Dives: 4

Day 3: Solor

This is the only area that we know off were mantas have been spotted. Facing south means cooler waters and less visibility, but it also means more life, bigger fish: giant groupers, barramundi cods, midnight snappers, all sheltering in the sloppy reefs around the islands of Kambing of Nuha.

No. of Dives: 4

Day 4: Soangi & Waiwawong

Soangi is a small island well expose to the swells, its coral reefs are habitat of abundant life and whitetip sharks patrol in search of opportunities. On the West coast Lembata amongst towering volcanos we arrive to Wai Wawong. This is excellent muck diving with a chance of seeing the elusive Rhinopias, Finger Dragonets, Ghost pipe fish and maybe even hairy frog fish.

No. of Dives: 4

Day 5 and 6: Rusa

This is a collection of 3 small islands in the middle of the cold water currents that flow between the islands of Kawula and Pantar. Spectacular rock formation, totally covered with corals, hard and soft, crinoids, anemones. Almost impossible to find any space. In the shallow clouds of red anthias, deeper large snappers, sweetlips, giant groupers, passing sharks. As pure as it gets.

Going in between the rocky bottom, slow and eyes for Nudibranchs, small shrimps, soft coral crabs and other critters living and feeding along them. In between dives we will head towards the open, and maybe if we are lucky a blue whale can pay us a visit.

No. of Dives: 4/day

Day 7: Pantar Straits (West)

Beautiful walls of macro and wide-angle subjects. Clean walls, abundant life and the always cooperative smile of the local community, specially the children who will like to be your underwater model.

No. of Dives: 4

Day 8: Kalabahi

A change of underwater topography: A day dedicated to pure muck dive in the Kalabahi bay where we can look for wonderous, Rhinopias, Gosht pipe fish, seahorses. An underwater macro heaven.

No. of Dives: 4

Day 9: Ternate & Pura

A Steep slopes and walls, timing with life. Abundance of fans and overhangs along the walls. Fusiliers, red tooth triggres,, white tips patrolling the shallows. Mandarin fish dive in the afternoon.

No. of Dives: 4

Day 10: Pantar Straits (East)

Beautiful rocky formation, and abundant life around the patches between the walls. We do see timid Mola Molas on the surface and and schooling dolphins hang in the near open waters.

On the south-east of Pantar, Beangabang Bay has one of the top night dives in the country: the chance to hunt for octopus, ghost pipefish, unusual shrimp, Bobbitt worms colourful nudibranchs and lots of juvenile fish.

No. of Dives: 4

Day 11: Treweng

Boulders hosting schooling snappers and surgeon for the last day of diving. Mola Molas tend to come to the surface near the island that is as well as a strategic place for whale watching.

Crossing after the second dive towards Kupang.

No. of Dives: 2

Day 12: Departure

Guests will be escorted to the airport in Kupang and assisted with check in procedures, no doubt full of talk about the wonders of the most popular dive destination in the world.

DISCLAIMERS

The trip will be weather dependent and there might be long crossing required throughout. We will, try to adjust the best we can to the conditions and fulfil all itinerary briefed when you're on the boat.

Due to the need to report to the local village, divers will need to be flexible with the start time of the first dive at some of the dive sites. We will ensure that you're given timely update on this during the trip, however your understanding on last minute changes would be appreciate. This is because divers are only allowed in the water once permission is granted by the local villages and officers.

Damai are flexible to change itinerary suggested based on customer's preference in the event that weather and time allow us to do so and if changes is agreeable by all participants on board
